

ICC Annual Meeting 2021

## Controversies in Compression Therapy

November 27, 2021 Amsterdam

back to back with Amsterdam ECoP

[www.europecollegeofphlebology.com](http://www.europecollegeofphlebology.com)

Preliminary Program

8.30 – 8.45: Welcome: Giovanni Mosti

8.45 - 9.45

- ECS or inelastic compression in edema treatment  
Flour Mieke: in favor of ECSECS  
Stöberl Christiane: in favor of inelastic material
- ECS or inelastic compression in VLU treatment  
Mosti Giovanni: in favor of inelastic material  
Milic Dragan: in favor of ECS

COFFEE 9.45 – 10.30

10.30 – 12.45

- Compression or no compression in diabetic patients  
Piaggese Alberto: in favor of compression  
Hirsch Tobias: in favor of no compression
- Compression or no compression in venous post-procedures  
Uhl Jean François: in favor of Compression  
Benigni Jean-Patrick: in favor of no compression
- Education in compression or chose of easy device?  
Da Matta Eduardo: in favor of education  
Wittens Cees: in favor of easy devices

- Is compression therapy contradicted for lower leg erysipelas/cellulitis?  
(or antibiotics like Penicillin only?)  
Eder Stephan: in favor of compression  
Queree Isabelle: in favor of no compression
- Compression or no compression in sport activities  
Gianesini Sergio: in favor of compression  
Rabe Eberhard: in favor of no compression

12.45 – 14.00: LUNCH

14.00 – 15.00

- Compression or no compression in arterial patients  
Schuren Jan: in favor of compression  
Neumann Martino: in favor of no compression
- Compression or no compression in PTS  
Caprini Joe: in favor of compression  
Neil Piller: in favor of no compression: recommendations from lymphological societies
- Compression therapy and antiinflammation in inflammatory dermatoses  
Dissemond Joachim

---

ICC Free Communication 15.00 – 16:10  
(8 minutes each, 2 minutes discussion)

- Franz Josef Schingale: Compression in Monstrous Lymphedema
- Reynald Convert: Evaluation of the effects of bandage types on interface pressure and its variation while walking and at rest
- Marzanna Zaleska: A high force 3 x 30 min compression method of foot and calf removes most edema fluid and enables immediate usage high compression garment
- \*Tessa De Vrieze
- \*Kerstin Protz
- \*Darren Burke
- \*Andrew Cameron
- \* Kerelous George

\* Medi Abstract Award
